

# DCO ENERGY GUARD SHACK

DCO Energy selected Mobile Modular to create a custom modular guard shack for Marie H. Katzenbach School for the Deaf to upgrade its security.

## THE CHALLENGE

Mobile Modular was selected by DCO Energy to provide a custom-built new 8×13 guard shack at Marie H. Katzenbach School for the Deaf. The Marie H. Katzenbach School for the Deaf was first opened in 1883 and has over 100 years of experience educating New Jersey's Deaf and Hard-of-Hearing children. The new 8×13 guard shack was procured to help provide better security for the school, over an existing 8×8 guard shack.

## THE SOLUTION

Mobile Modular was selected by the client due to expertise in custom design-build projects. Mobile Modular played a role in the design of the building to include custom Anderson-style windows and sliding doors to meet expectations. Mobile Modular handled the delivery, installation, and welding of guard shacks onto foundations built by others.

**Customer Name:** DCO Energy

**Project Location:** Trenton, NJ

**Building Type(s):** Modular Specialty

**Job Type:** Sale

**Total Sq. Ft:** 64 sq. ft.
