

# MOBILE MODULAR PLUS ADD-ON SERVICES:

## ENHANCING MODULAR SOLUTIONS FOR DA EVERETT CONSTRUCTION AND ELI LILLY PHARMACEUTICALS

### THE CHALLENGE AND SOLUTION

The primary challenge was to swiftly provide over 6,400 square feet of temporary office space that was not only functional but also equipped with all necessary amenities to ensure a smooth operation. This space needed to be operational within a tight two-month deadline, requiring a solution that was both quick to deploy and tailored to the specific needs of the pharmaceutical industry.

Mobile Modular, leveraging its Plus Add-On services, was the chosen partner for this ambitious project. The solution involved the provision of two modular units, fully furnished and equipped with a comprehensive range of Add-On services to meet the project's unique requirements.

These Add-On services were integral to transforming the modular units into a fully operational office space, tailored to the specific needs of the project. The inclusion of high-quality furnishings and essential amenities ensured that the temporary office was not just functional but also comfortable and conducive to productivity.

### WHAT WE PROVIDED
