

GENESEE STEM ACADEMY

Mobile Modular provided temporary and permanent modular solutions for Genesee STEM Academy to accommodate the influx of students.

THE CHALLENGE

The growing Genesee STEM Academy needed a temporary and permanent modular solution to accommodate the influx of student enrollment for the upcoming school year.

THE SOLUTION

With only a few months to get this done, Mobile Modular was able to provide a temporary solution from our available fleet classrooms as well as complete the design, engineering, and manufacturing of the permanent 14-classroom addition in one semester.

The new addition featured spacious-sized classrooms at 27'x30' including science and technology classrooms with full restroom facilities for over 200 students and staff. Mobile Modular also provided the on-site construction of the site connecting the link to adjoin the existing school to the new addition.

Customer Name: Genesee STEM Academy

Project Location: Flint, MI

Building Type(s): Modular Classrooms

Module Count: 14

Total Sq. Ft.: 12,000 sq. ft.
