

LANDMARK CHRISTIAN SCHOOL

Mobile Modular's modular buildings were a quick solution for Landmark Christian School after they experienced a large growth in student enrollment.

THE CHALLENGE

Landmark Christian School experienced large growth in student enrollment and needed a quick solution to accommodate the influx of students.

THE SOLUTION

Mobile Modular provided the school with two facilities, one with 12 classrooms for high school students and one building that would function as a tutoring facility for groups and individual students. The 12-classroom building was logistically challenging as the site had a 7' change in grade, leading to some of the modules being installed at an elevation.
