

MOBILE MODULAR ASSISTS IN PROVIDING IMMEDIATE HOUSING FOR THE HOMELESS

COVID-19: Responding
To a Community in Need

THE CHALLENGE

While reviewing the site with County of San Mateo rep Tory Newman, two problems became evident: the site itself was not level nor was it accessible via normal truck delivery. We determined that a forklift would be necessary for delivery and promptly notified the customer of the additional charges, and had a change order approved the same day. Additionally, the site review for this project was also crucial because we were able to determine the exact size of custom piers that would be needed.

THE SOLUTION

Once the units were fully prepped, we successfully delivered:

- Two 24' x 40' offices
- One 12' x 40' office
- Two 12' x 60' restroom/shower units

In only a matter of days from start to finish we gave the customer exactly what they needed, solved site-specific issues, and coordinated the installation of ramps -- all done by March 24. Because we were able to react so quickly and had inventory ready to go, we could not only fill an imperative need, but also offer our customer a variety of options to choose from.
