

NEUROLOGY & STROKE ASSOCIATES MODULAR BUILDINGS FOR MRI

Mobile Modular delivers modular building to house a local MRI system in Pennsylvania. Design meets zoning requirements, and enhances patient experience.

THE CHALLENGE

With the absence of a local MRI, patients of the Neurology and Stroke Associates in Lititz, Pennsylvania were forced to travel to surrounding cities for scans. For the independently owned and operated practice to improve their patient's experience, they sought to add their own system, but zoning and limited space for new construction would make this a challenge.

Customer Name: Neurology & Stroke Associates

Project Location: Lititz, PA

Building Type(s): Modular Healthcare

Job Type: Sale

Total Sq. Ft: 7,832 sq. ft.

THE SOLUTION

Following a lengthy and detailed six-month submittal process, our team, along with the civil engineer, developed a solution that would adhere to the zoning requirements and allow for the installation of a new Phillips 3.0 Tesla MRI system. The design also allowed for the expansion of the practice's infusion treatment chairs.
