

# ADVENTURE CHRISTIAN SCHOOL

New high school sought to broaden their academic programs, aiming to provide a more comprehensive educational experience and meet the growing needs of their student community.

## THE CHALLENGE

To ensure the new high school area was ready to open before the 2024-2025 school year by collaborating closely with the school's general contractor and various subcontractors. The goal is to work as a unified team to complete site preparation, prepare the portables, manage their delivery and installation, and install ramps within a tight timeframe from April 15th to August 15th.

**Customer Name:** Adventure Christian School

**Project Location:** Rocklin, CA

**Building Type(s):** DSA modular classroom & restrooms

**Building Sizes:** 13-24x40 classrooms, 2-12x40 restrooms,  
1-36x40 multipurpose room

## THE SOLUTION

Mobile Modular successfully delivered and installed 13 classrooms, a multipurpose building, and 2 restrooms with a custom ramp before the start of the new school year.

One major challenge was completing the work safely and efficiently during the extreme summer heat, but our crews adhered to all necessary safety precautions, ensuring the well-being of all employees. Another challenge arose with last-minute changes to the custom ramp layout. We quickly collaborated with our vendor to redesign the layout and made the necessary modifications to the already installed ramp, demonstrating our commitment to flexibility and problem-solving.
