

SPRING LAKE ALTERNATIVE SCHOOLS

Mobile Modular constructed a four classroom permanent modular building for Spring Lake Alternative Schools complete with offices and restrooms.

THE BACKGROUND

The Alternative Education Program at Spring Lake High School in Spring Lake, MI, had been housed in 25-year-old modular buildings located in the bus garage parking lot. The district wanted an upgraded facility that would provide the students with an educational environment that was equal to that of the recently updated high school. The building sits in a picturesque setting surrounded by a pond and is within a short walk of the main high school campus. Utilizing the existing property was of utmost importance to the district because they wanted the alternative students to have access to activities at the main campus.

Customer Name: Spring Lake Schools

Project Location: Spring Lake, MI

Building Type(s): Modular Classrooms

Job Type: Sale

Total Sq. Ft.: 4,200 sq. ft.

THE PROCESS

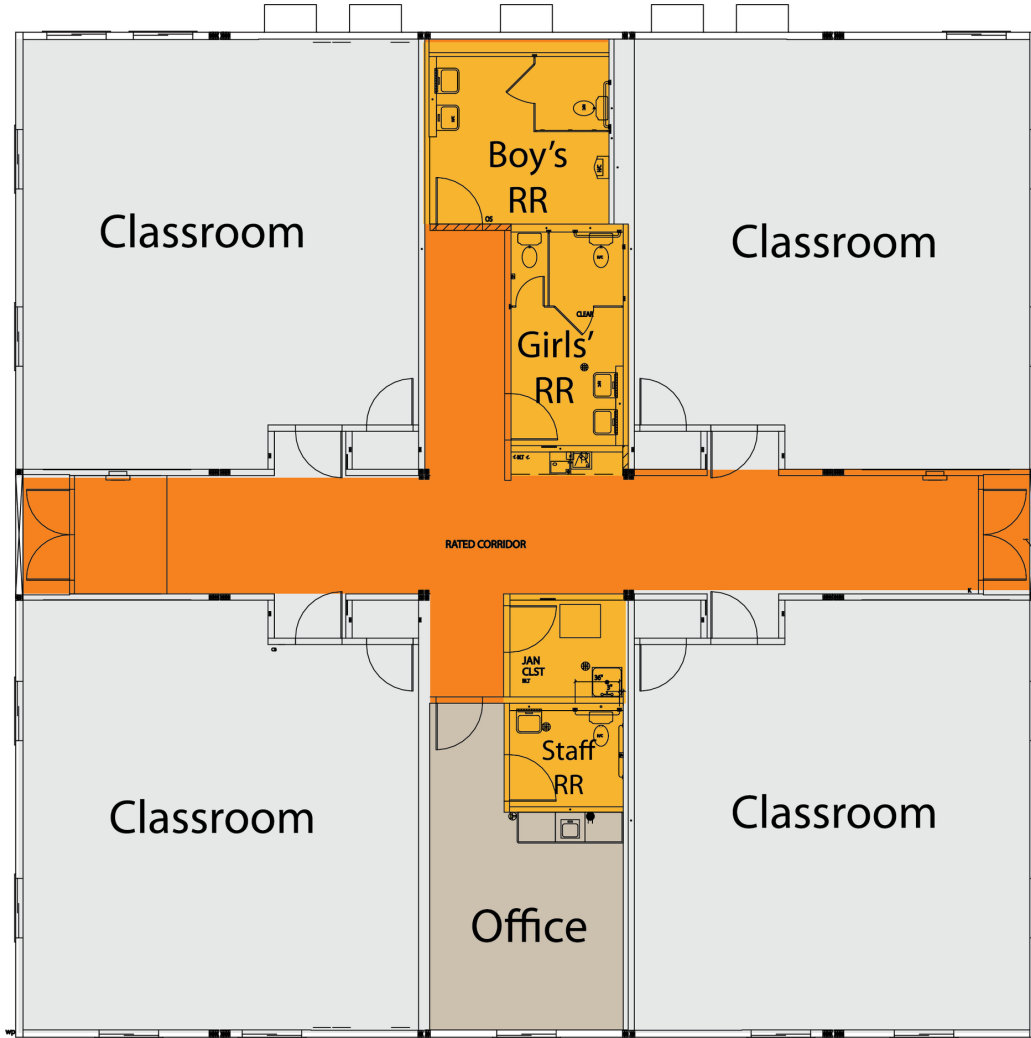

Our team constructed a 4-classroom permanent modular school building with offices and restrooms. The building sits on a permanent block foundation with a crawl space and features Whitley Manufacturing's High-Profile Roof System. The roof was factory-installed with a flat profile. Once the building was installed, the hinged roof was lifted to create a 4:12 pitch, giving it an aesthetically pleasing, site-built look. Spring Lake's modular facility upgrade for their alternative education program has had a positive impact on the students and is viewed by the community as money well spent.
