

TENNESSEE BOARD OF REGENTS

Mobile Modular completed a contract with the Tennessee Board of Regents to complete a mobile training center at one of the state's state universities.

THE CHALLENGE

Mobile Modular was awarded a contract with the Tennessee Board of Regents (TBR) to design, engineer, and solicit manufacturing proposals, and production and site installation of a steel-framed modular structure to be used as a mobile training center located at one of Tennessee's State Universities.

THE SOLUTION

The project included the fabrication of multiple transportable modular units which were connected on-site with minimal site adaptation work. The units are capable of supporting classroom space, welding lab space, and self-contained utilities including restroom facilities and electrical services for training equipment. The units are capable of using both on-site electrical services as well as generator-supplied services. They also feature self-contained waste and water systems. Units included entrances with canopies, ramps, and steps which were transported with the units.
