

Campus Maker mPlex™
classrooms feature:

- Industry-leading noise reduction between classrooms
- High-efficiency HVAC system
- Intelligent energy management system featuring automatic temperature, humidity and fresh air exchange controls
- Highly energy-efficient design that meets multiple IECC standards
- Energy-efficient T8 electronic ballast and lamps
- Commercial-grade, heavy-duty vapor barrier
- White EPDM cool roof
- Traverse roof to divert rainfall drainage away from exterior openings
- Choice of flooring options
- Vinyl frame dual-pane low-E windows
- Wiring for audio visual and technology packages utilized in today's classroom environments
- Certification to meet all building code and accessibility standards in multiple states, including Texas, Oklahoma, Louisiana and Arkansas

The Campus Maker mPlex offers a comprehensive selection of options to meet even the most stringent specifications.

Campus Maker mPlex sustainable
options include:

- Passive shading devices
- UVC light for HVAC condenser cells
- CO₂ monitoring system
- Radiant heat barrier
- Tubular daylighting system
- LED fixtures and lamps
- Natural fiber insulation
- Forest Stewardship Council (FSC) certified lumber
- Locally sourced materials
- Low-flush toilets with smart valves
- Tankless hot water heater
- Automated faucets
- Automated paper towel and hand soap dispensers

Mobile Modular's
Campus Maker mPlex™
The Flexible Solution for Sustainable Learning Spaces

Campus Maker mPlex – the state-of-the-art eco-friendly modular classroom.

Adaptable Classrooms for Today's Changing Schools

Sustainable and Customized Learning Environments

Fluctuating school enrollment. Shifting demographics. Changing expectations. The Campus Maker mPlex™ delivers flexible solutions for today's rapidly evolving educational needs.

Today's school districts are seeking better, more secure and adaptable ways to make the most of their space. Now with the revolutionary Campus Maker mPlex, creating a reusable and sustainable learning environment has never been easier.

Constructed from durable materials and designed to be easily configured into a variety of self-contained classroom complexes, the Campus Maker mPlex delivers an optimal learning environment offering security, energy efficiency and a building design that can be adapted to different enrollment needs.

Flexibility

The expandable and retractable design of the Campus Maker mPlex offers a wide range of configuration options, including restrooms, administrative offices, libraries, laboratories, music classrooms and more.

Savings

The innovative side-by-side classroom installation of the Campus Maker mPlex significantly reduces the length of utility runs, electrical and plumbing connections, walkways, stairs and access ramps.

The perimeter walls of each double classroom are finished as future exterior walls, allowing for easy reconfiguration to a larger or smaller size based upon enrollment with minimal disruption to adjacent classrooms.

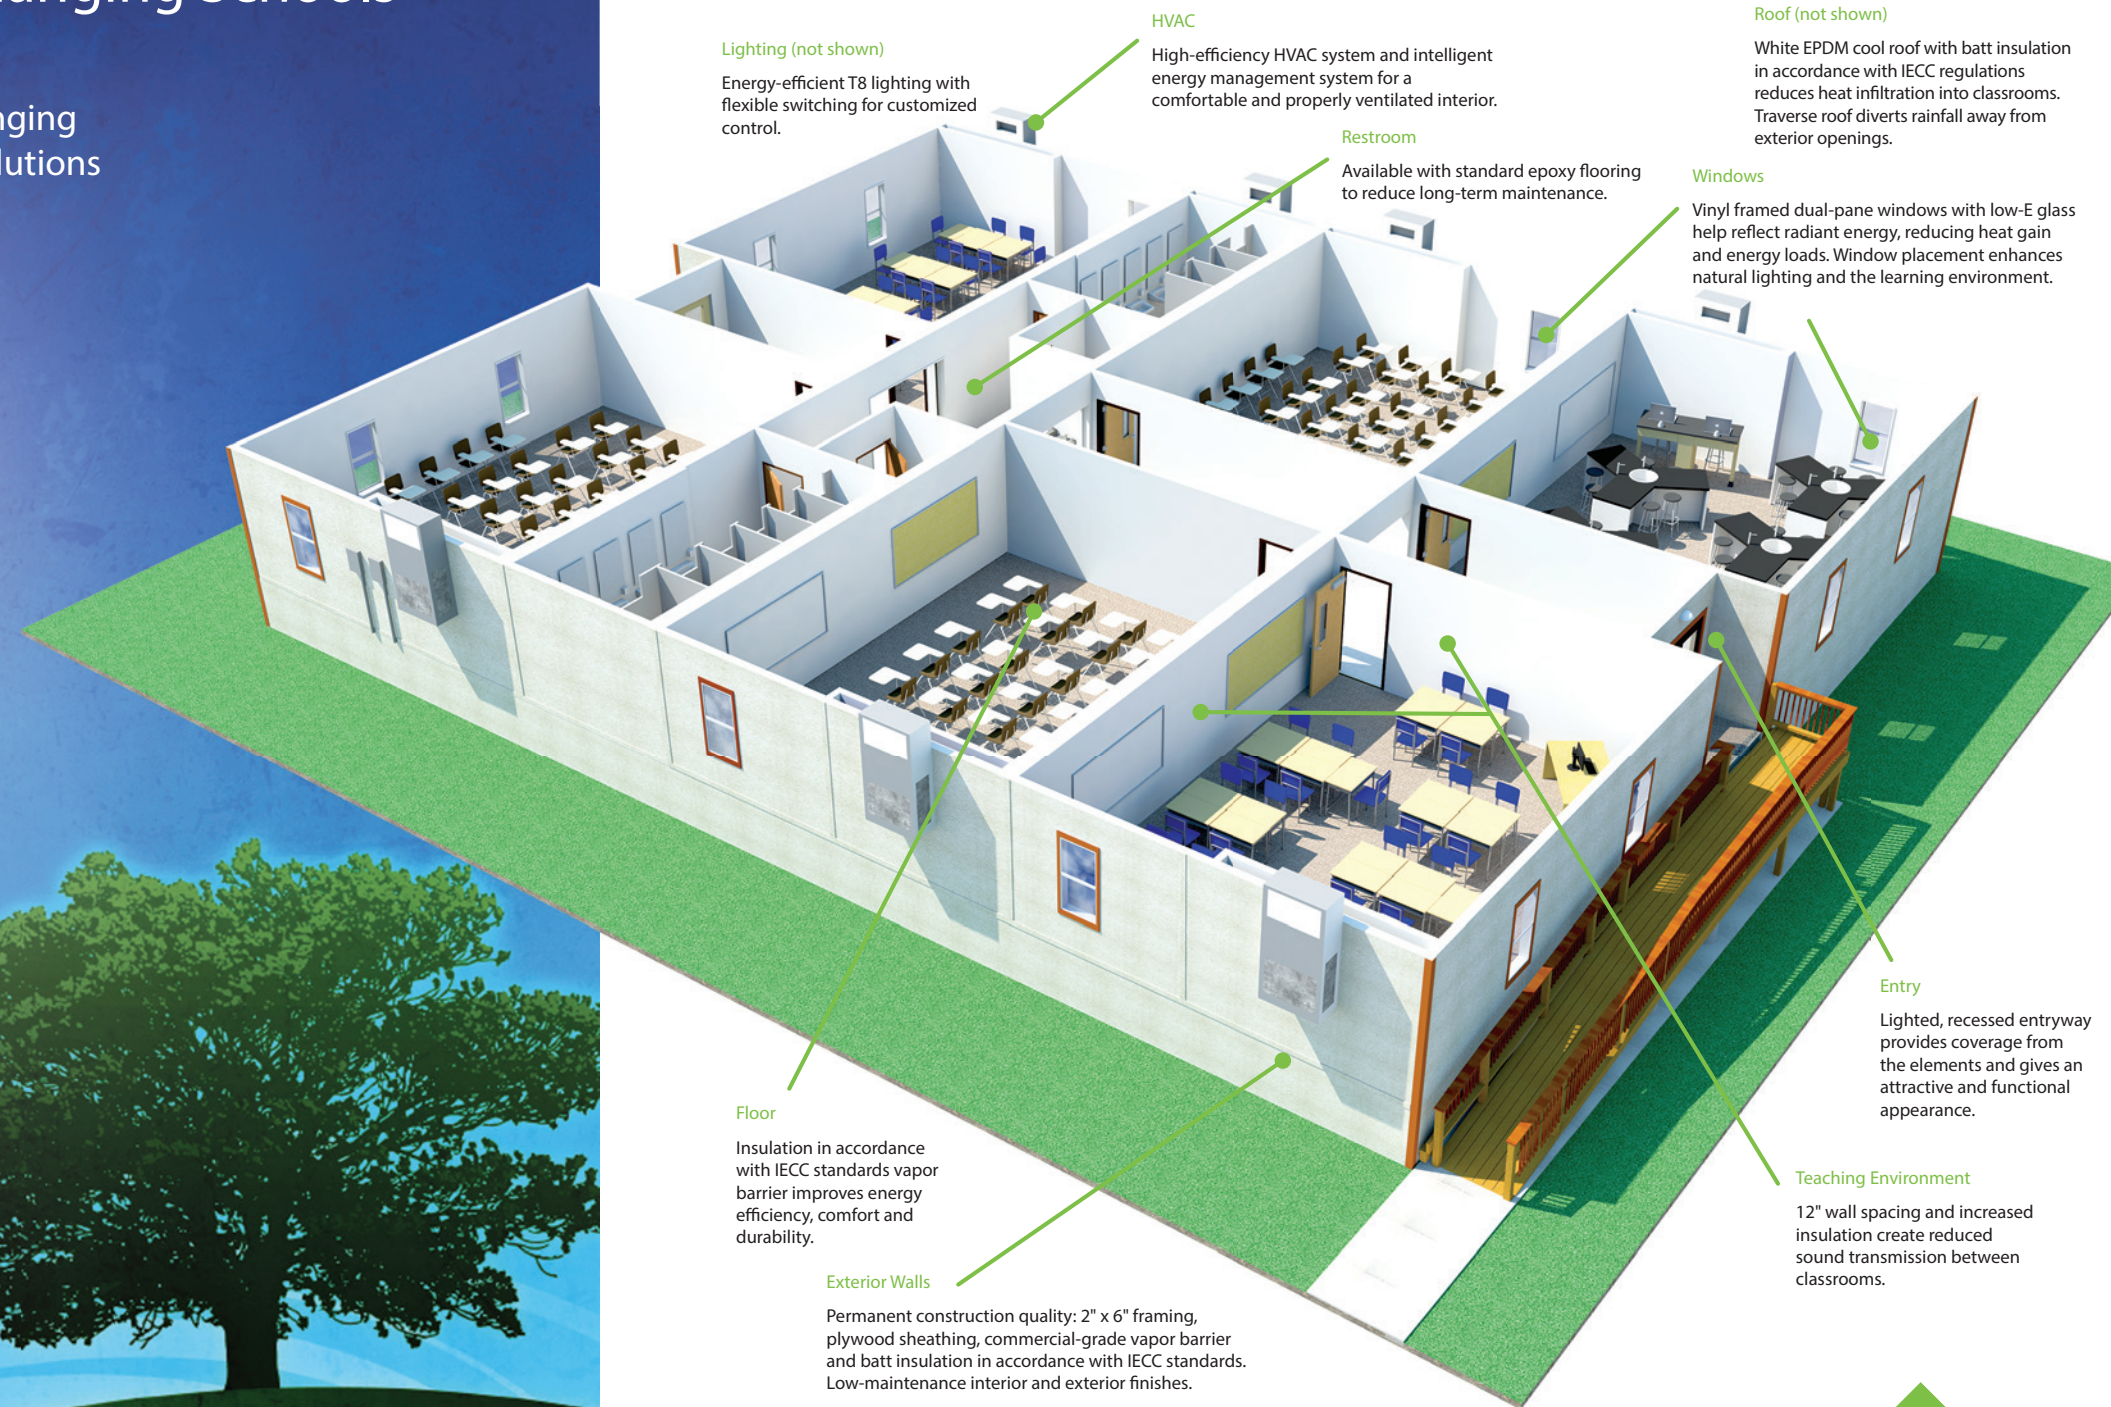

Safety and Security

Each Campus Maker mPlex complex is accessed via an internal corridor with steel-clad exterior doors, self-closers and panic hardware, and each classroom is accessed through a solid-core fire-rated door with a large view window and locking system.

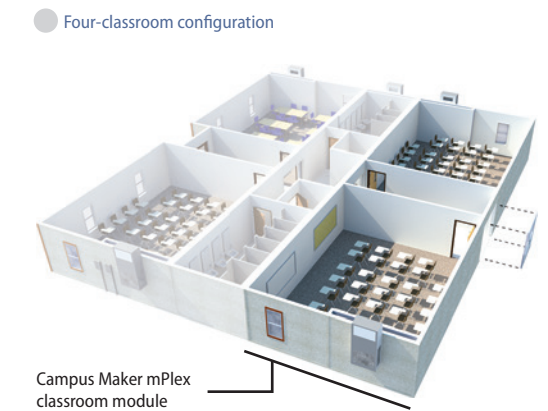

All doors can be equipped with optional alarms and electronic entry control and easily integrated with each facility's primary security and systems.

Mobile Modular's Campus Maker mPlex™ Complex

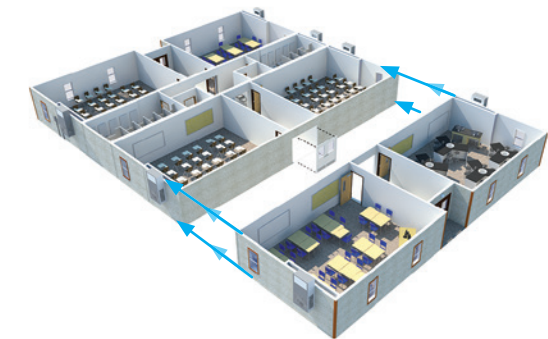

Protected, Flexible and Environmentally Friendly

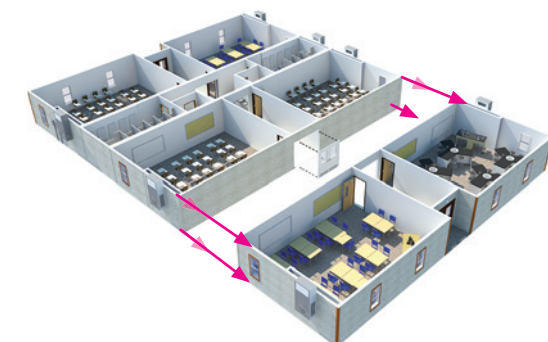

To adjust the size of the Campus Maker mPlex the two-classroom module at either end can be detached and relocated to another site or school. Construction of a new exterior wall is not required, as the wall and finishes are already in place. This feature minimizes downtime and disruption to the remainder of the complex during construction.

+ Add an additional classroom module

By simply removing and relocating the existing security entrance doors to the newly expanded Campus Maker mPlex this classroom complex is set to operate with six classrooms, a restroom module and a corridor. This work can be completed with minimal disruption to occupants, and in most cases, within just a few days.

- Retract a classroom module

The above illustration depicts a six classroom Campus Maker mPlex complex with a restroom module and integrated interior corridor. A Campus Maker mPlex classroom module is comprised of two classrooms (27' 0" x 28' 0")* with an egress corridor. Each classroom accommodates up to 32 students. The interior corridor is 8' 0" wide and enhanced with a one-hour-fire-rated construction. Sprinklers can be installed for additional protection.

Need less space? Our Campus Maker Hybrid and Campus Maker Double Classroom offer single and double classroom solutions with the same innovative options.
